Conflict Minerals Declaration

As a responsible producer of components for control and measurement equipment, we make every effort to ensure that the materials used in the production of our products do not contain minerals (3TG) from areas affected by armed conflicts.

Please be advised that we do not cooperate with producers of raw materials, but only with suppliers of ready-made elements - semi-finished products.

We are a company with many years of practice and an established position on the international market and we feel committed to actions supporting environmental protection and respecting human rights.

Therefore, we regularly expect all our suppliers to provide information on the use of 3TG minerals.

Based on the previous declarations from our partners, we have not registered the use of 3TG minerals from illegal sources.
