

ENVIRONMENTAL STATEMENT

The subject of activity in Limatherm Components Sp. z o.o. is production of components dedicated to solutions in the field of measurement and control, also in hazardous areas (Ex). We strive to achieve our business goals while respecting all environmental aspects.

Our team achieves that by:

- ✓ continuous technological adjustment to standards limiting the impact on environment
- ✓ following the rules and requirements set out by law
- ✓ managing production waste minimizing its amount and conducting selective storage (internal treatment plant of industrial coolant with possibility of further reusing separated/recovered components)
- ✓ reduction of Energy used (optimized machined park, photovoltaic panels)
- ✓ adaptation of transportation fleet to be more environmentally friendly (hybrid cars)
- ✓ Increase of pro-ecological knowledge among our materials and services suppliers (compliance procedures)
